

MUHAMMAD ZAYAN

4+ Years Unity Developer, Mobile Games & Playable Ads Specialist

LinkedIn | Portfolio | Contact Info | Lahore, Pakistan | +92 304 1430620

Profile

Unity Game Developer with more than four years of professional experience creating mobile games, playable advertisements and Roblox projects. Experienced in taking games from concept and prototyping through gameplay development, monetization, optimization, debugging and store-ready releases.

Education

Minhaj University Lahore

2017 - 2021

Bachelor of Science in Computer Science

- Focused on programming, object-oriented design, software engineering, algorithms, databases and game-development fundamentals.

University of Engineering and Technology, Lahore

Apr 2020 - Jul 2020

Unity Game Development Certificate

- Completed practical training in Unity, C#, gameplay scripting, physics, UI, animation, scene design and mobile deployment.

Skills

Languages: C#, JavaScript, C++, SQL, HTML, CSS

Technologies: Unity 2D/3D, Luna Playable Ads, Roblox Studio, Git, Firebase, AdMob, AppLovin MAX, Unity Ads, REST APIs, Addressables, DOTween, Cinemachine and NavMesh

Mobile & Monetization: Android and iOS builds, rewarded ads, interstitials, banners, mediation, in-app purchases, analytics, remote configuration and store release support

Game Development: Hyper-casual, hybrid-casual, puzzle, simulation, arcade, action and kids games; gameplay systems, AI, physics, UI, animation, progression, optimization and debugging

Professional Experience

Tiny Kraken Games

Lahore, Pakistan

Game Developer

Aug 2025 - Present

- Develop complete 2D and 3D mobile games from initial concepts and prototypes through production-ready Android and iOS builds.
- Implement gameplay loops, player controllers, AI behavior, camera systems, UI, animation, level progression, rewards and persistent save systems.
- Integrate advertisements, in-app purchases, analytics and configurable gameplay features while maintaining a smooth player experience.
- Profile frame rate, memory and loading performance, resolve device-specific issues and prepare stable builds for store submission.

Finz Games

Lahore, Pakistan

Software Engineer - Playable Ads

Sep 2024 - Jul 2025

- Created interactive playable advertisements primarily in Luna, adapting full game concepts into concise and engaging ad experiences.
- Designed tutorials, responsive interactions, fail/win sequences, end cards and call-to-action moments for user-acquisition campaigns.
- Optimized asset size, loading time, scene complexity and runtime performance to meet strict playable-ad platform requirements.
- Produced multiple creative variations rapidly and maintained reusable code components for faster campaign delivery.

Highbit Games

Lahore, Pakistan

Unity 3D Developer

Feb 2023 - Aug 2024

- Built multiple hyper-casual, hybrid-casual, simulation, puzzle and 3D mobile games from scratch.
- Implemented player mechanics, enemy and NPC behavior, physics interactions, cameras, UI, rewards, upgrades and level systems.
- Integrated rewarded ads, interstitials, banners, mediation and in-app purchases while balancing monetization with user experience.
- Diagnosed gameplay and SDK issues, improved frame rate and memory use, reduced build size and supported Android releases.

Mindbotix Studio

Lahore, Pakistan

Unity 3D Developer

Jan 2022 - Feb 2023

- Developed and maintained 2D and 3D games, taking projects from early prototypes to complete playable builds.
- Created reusable gameplay systems, menus, progression, reward loops, physics interactions and polished player controls.
- Worked on Roblox game concepts and supported scripting, level interactions, testing, debugging and release preparation.

Selected Contributions

- Delivered complete games from scratch, including gameplay architecture, UI, progression, ads, in-app systems and final release support.
- Created reusable components and development workflows that reduced repeated implementation across multiple casual-game projects.
- Balanced performance, monetization and player experience through profiling, ad-placement planning and iterative gameplay polishing.
- Worked effectively with design, art, QA and marketing teams while independently owning assigned production features.

Projects

Published Mobile Games Portfolio

Unity 2D/3D - Android & iOS

- Developed numerous games from scratch across multiple Google Play portfolios, including casual, simulation, puzzle, action and kids-game categories.
- Owned gameplay programming, UI implementation, level systems, ads, in-app features, optimization, debugging and production support.

Portfolios: Tap Dog Studio

Playable Ads Collection

Luna Playable Ads

- Converted mobile-game concepts into lightweight interactive advertisements with rapid onboarding, responsive controls and clear conversion paths.
- Created reusable systems for tutorials, hand indicators, dynamic UI, end cards, retry flows and rapid creative variations.
- Optimized scenes for quick loading, small file size and stable performance across ad-network environments.

Hyper-Casual & Hybrid-Casual Systems

Gameplay, Progression & Monetization

- Designed complete gameplay loops with missions, upgrades, rewards, fail/win states, level progression and retention-focused feedback.
- Integrated ad placements and in-app systems without interrupting the core player experience.

Roblox Game Development

Roblox Studio

- Worked on Roblox gameplay concepts, interaction systems, level logic, player progression and debugging.
- Applied mobile-game design experience to create clear objectives, rewarding loops and accessible controls.

Professional Strengths

- Able to own complete game-development tasks independently, from prototype and gameplay architecture to final optimization.
- Comfortable collaborating with designers, artists, QA and marketing teams in rapid-production environments.
- Strong focus on clean reusable code, responsive game feel, player clarity, monetization balance and production stability.

Thank You!
